BNS Correspondence - 3 August 2026

SUPPLIED COPY / TYPED EXTRACT ONLY. Preserve the original email chain and obtain a signed BNS witness statement and underlying records before relying on these allegations at hearing.

Reported source

Email from Tina Munford, BNS Management Services, to Mr and Mrs W Mumford, dated 3 August 2026, concerning Flat 7, Machin Mews.

Summary of reported matters

BNS reported that engineers and cleaners were unable to work in the block because of an extreme smell of cat urine which BNS said originated from Flat 7. BNS said this blocked essential works, including an EICR awaited since May. BNS also reported previous requests to remove cats and clean mess outside the door, resident complaints, and a refusal by engineers to enter until the reported biohazard was resolved.

Required corroboration

Request the original email, earlier cat-permission and cleanup correspondence, EICR appointment and refusal records, engineer and cleaner evidence, complaint log, and any inspection, environmental-health or remediation evidence.
